

It's a Big Mistake

For you to assume that your employees understand the necessity of hand washing and surface cleaning is a mistake. You have to teach them; people require instructions that include an organized effort to learn personal hygiene. Two-thirds of all food-borne illness is transferred by the hands. Recent statistics show that millions of illnesses and thousands of deaths, that are attributed to pathogens, could be controlled by proper hygiene. The center for Disease Control reports that at least 100,000 Americans die annually from hospital acquired infections, primarily staph, and that much of it could be prevented with proper hand washing by healthcare workers. You should not assume that your staff's sanitary standards are the same as yours. Signs stating that "Employees Must Wash Their Hands Before Returning to Work" are simply not enough. Protect yourself, your employees and your reputation. Don't put your future into unwashed hands.

48 years of providing products and training solutions for infection control.

Glo Germ Mini Kit

The mini kit is a disposable kit designed to teach 30 to 50 people proper hand washing. This is a great product for teaching smaller groups or a one time training. The mini kit contains one 2 oz. bottle of gel, the ultra-violet keychain light, and the informative Trainers Manual.

GGMK.....\$9.95

Premium Mini Kit

The Premium Mini Kit includes the 1003 lamp w/three AAA batteries included, a 2 oz. bottle of Glo Germ gel, a 1.2 oz Glo Germ Powder, Trainers Manual and a set of Activity sheets. This kit is excellent for hand washing training (up to 50 demonstrations) and cross contamination demonstration and testing.

PMK.....\$36.95

Kit pictured with Gel

Kit 1003 Gel/Oil

This kit contains a hand-held 9 LED ultra-violet flashlight, an 8 ounce bottle of Glo Germ Gel/Oil, a 1.9 ounce bottle of Glo Germ Powder, and three AAA batteries in a case.

K1G1.....\$71.50

K1O1.....\$71.50

Complete Kits

Kit 1006 Gel/Oil

This kit contains a hand-held 21 LED ultra-violet flashlight, an 8 ounce bottle of Glo Germ Gel/Oil, 1.9 ounce bottle of Glo Germ Powder, three AAA batteries in a case.

K1G2.....\$92.50

K1O2.....\$92.50

Kit pictured with Oil

Glo Box Kit 1006 Gel/Oil

The Glo Box Kit contains a fold flat Glo Box, one 8 ounce bottle of Glo Germ Gel/Oil, a 1.9 ounce Glo Germ Powder, a 21 LED UV Flashlight, and three AAA batteries in our hard plastic carry case.

Kit pictured with Oil

Powder, Mist, Gel & Oil

Glo Germ Powder

The Glo Germ Powder comes in a 4 ounce (by volume) bottle (1.9 oz by weight) and is used to demonstrate proper surface cleaning as well as the spread of germs, especially in the area of cross-contamination. Each bottle is good for hundreds of demonstrations since only a very small amount is used each time. Brilliant white (also available in orange by special order, contact us for details)

GGPIO.....\$17.50

Glo Brush Applicator

The adjustable flow Glo-Brush lets you apply a thin layer of powder to any surface quickly and without waste. The Glo-Brush has a refillable powder reservoir and a cover to protect bristles. Especially useful in training for cross-contamination, bio-terrorism preparedness training and PPE doffing. This product comes with The Glo Germ Powder in a 4 ounce (by volume) bottle (1.9 oz by weight)

GA.....\$48.50

Glo Germ MIST Spray Canister

Glo Germ MIST Spray Canister. This is an aerosol free, easy to use pump canister for airborne microbe simulation. To be used with MIST Refill. SPRAY CANISTER ONLY, NO PRODUCT INCLUDED

MISTSC.....\$30.00

Glo Germ MIST Refill

Glo Germ MIST refill in an 8 ounce bottle. This product is to be used with the Glo Germ MIST canister

RFMIST.....\$16.75

Glo Germ Mist Combo Pack

Glo Germ MIST Combination pack includes the Glo Germ MIST Spray Canister and an 8 ounce refill

MSTCMB.....\$40.25

Surface Cleaning Gel

Used to test for proper cleaning of non-porous, hard surfaces. 2 fluid ounces.

SCD.....\$9.95

Glo Germ Oil

The original formula since 1968. Glo Germ Oil shows up bright orange under UV light. This product comes in an 8 ounce bottle and is used to demonstrate proper handwashing. Used in the medical field where greater accuracy is required. Oil may stain clothing and some surfaces. Each bottle is good for 75 to 100 applications.

GGO8O.....\$18.95

Glo Germ Gel

The gel is recommended where staining may be of concern. The Gel shows up brilliant blue-white under UV light. Comes in an 8 ounce bottle and is used to demonstrate proper handwashing. This product is more user-friendly than Glo Germ Oil. Each bottle is good for 75 to 100 applications. For larger quantities Gel can be purchased by the gallon.

GGG8O.....\$18.95

Glo Germ Mini Gel

For greater convenience, you can get Gel in a 2 ounce bottle. Same great product as the 8 ounce version. Used to demonstrate proper hand washing. 30 to 50 applications.

MG2O.....\$5.50

Get 5 for the cost of 4

MG2O5FPO4.....\$22.00

Replacement Bulbs & Lamps

UVL 1003

This powerful 9 LED focused ultraviolet flash light is light weight and compact. This light features, an anodized aluminum no-slip grip and a wrist strap. Twist on to inspect hands and surfaces. Requires three AAA batteries (included).

UVLL1003.....\$38.95

UVL 1006

Our most powerful Ultra Violet Lamp, this 21 LED flashlight provides a focused beam of UV light that will fluoresce Glo Germ in broad daylight! Featuring a push button that toggles the light on and off, this lamp is anodized black, and comes with a wrist strap. Requires three AAA batteries (included).

UVLL1006.....\$53.95

Replacement 801 Bulb

Replacement Bulb for the 801 light stick.

RB801.....\$15.50

Glo Box & 1006 Light

The Glo Box is a soft shell, foldable box that will allow you to do demonstrations in brightly lit surroundings. Designed to block ambient light and provide a vivid display of simulated germs. This item comes with a 21 LED UV Flashlight (batteries included) and the foldable Glo Box.

GLT6.....\$75.50

Get just the Glo Box

GLBX.....\$48

Using Glo Germ

TO USE THE MIST

- 1) Slowly open MIST Spray Canister, using caution if sprayer is still pressurized. Pressure can be released by slowly twisting the top of cap on Canister.
- 2) Shake MIST Refill bottle and pour into MIST Spray Canister. Be sure to not fill the Spray Canister more than half way.
- 3) Tighten sprayer lid, using caution that all seals are aligned.
- 4) Shake well and pump MIST Spray Canister lid 12 times or until mildly firm.

For use on Surfaces: Evenly coat surface(s) of test area. After a 3 – 5 minute dry time, Glo Germ MIST is virtually invisible to the naked eye. The product will spread much like actual microbes to reveal where dangerous practices can lead to cross-contamination.

For use in air: A quick spray into the air will simulate a sneeze or cough. To simulate further airborne bacteria, spray for two seconds in a sweeping circular motion.

CAUTION: The same characteristics that make Glo Germ MIST behave like real germs, also make it hard to contain. Glo Germ MIST may remain suspended in the air for up to 5 minutes. Contact lens wearers may find it irritating. MIST may also spread and be hard to remove from certain surfaces and clothing. We recommend some trial usage in test areas, prior to a training event, to eliminate these problems.

Using Glo Germ

HAND WASHING TRAINING

1. Shake the bottle of Glo Germ Oil well and place a small amount, about the size of a quarter, into the palm of one hand and spread the product over both hands completely, as if applying hand lotion. Be sure to cover hands completely (particularly under nails, around cuticles and between fingers). Wipe off excess with paper towel. Do not let Glo Germ Oil contact clothing as staining may result. When using white Glo Germ Gel, use same procedure with an amount the size of a nickel. Wiping off excess is usually not necessary.

2. Place hands under UV lamp to view “glowing germs” that exist before hand washing.

3. Perform the CDC-recommended hand wash using soap and warm water. The amount of effort required to remove the simulated germs is equal the that of removing most bacteria.

4. After washing hands, place them under UV lamp, paying special attention to thumbs, cuticle beds and between fingers. The UV lamp reveals the remaining “germs” as proof of improper hand washing.

Complete removal of Glo Germ with normal washing is more difficult if skin is chapped or cracked, indicating that bacteria is also harder to remove. This will require a hand care regimen with a quality lotion twice daily and a judicious use of a hand sanitizing gel.

SURFACE CLEANING

1. Lightly dust a small amount of Glo Germ Powder over an entire surface area.

2. Clean the surface until all visible Powder disappears.

3. Pass the UV lamp over the surface, the remaining traces of Powder will glow on the areas that were not cleaned thoroughly.

*Please Note: Glo Germ products will not show actual germs. The “glowing germs” you will see is the Glo Germ product itself. All of our products are intended to simulate germs and bacteria.

FOOD CROSS-CONTAMINATION

1. Sprinkle Glo Germ Powder very lightly over a head of lettuce, tomato or another fruit or vegetable to be processed by trainees, so that the Powder is not visible in ordinary light. (Food used is to be discarded after demonstration.)

2. Have trainees process food using their normal procedure and kitchen utensils.

3. Use UV lamp to show how the “glowing germs” are spread to hands, cutting boards, knives and to other foods.

1. Apply Glo Germ Oil or Gel to hands per instructions.

2. Hold hands under UV lamp to show “glowing germs”.

3. Wash hands with soap and water as usual.

4. Check hands under UV lamp to show areas not washed properly. Pay close attention to knuckles and cuticles.

Warranty Statement: Glo Germ Products

All Glo Germ™ products are fully guaranteed to work as represented. They are being offered unconditionally to customer satisfaction to function as represented and no other guarantee is expressed or implied. If unsatisfied, the Glo Germ Company will refund the full purchase price upon returning the product. Glo Germ Company does not assume any responsibilities resulting from misuse or accidents, spillage and mishandling. The batteries are guaranteed to be fresh on the date of purchase.

Training Materials

World of Germs CD

A fun, music CD. 15 original songs to raise awareness of the dangers of bacteria.

WOGC.....\$12.95

Germs Make Me Sick

With Marilyn Hefner's full color illustrations, bacteria and viruses have never looked so good! As packed with wit and good humor as it is with charts and diagrams. This book is still the best explanation of how your body fights germs.

GMMS.....\$5.95

Activity Sheets Grades K-6

Games, puzzles, and pictures to color that teach children the importance of proper hand washing. Each set has sheets for grades K-6. Available in English and French

HASFGK.....\$1.95

Germs Away! Childrens Workbook

Six pages of activities and coloring in this 5 ½" x 8 ½" workbook help kids learn how to stop the spread of germs. They will learn the best way to wash their hands to remove the germs and about covering their coughs and sneezes. They are suitable for schools, after-school programs, day care centers, clinics, hospitals, or any educational event for children.

GACW.....\$1.75

Wash Those Germs Away! Poster

The creepy hand on this poster is crawling with reminders of common surfaces where germs lurk. It graphically reinforces the message of why children need to wash their hands.

11x17 Laminated Poster

WTGAP.....\$9.95

Wash Your Hands! Poster

Encourage children to wash their hands. This poster illustrates how children should wash their hands for 20 seconds by singing happy birthday two times.

11x17 Laminated Poster

WYHP.....\$9.95

Miscellaneous

Buster Mascot

This is Buster, our mascot. He is about 6 inches tall, round and soft. Great for awards, gifts and reminder for proper hand washing.

BM.....\$9.95

Glo Germ Black Carry Case

Glo Germ black carry case. This large sized, sturdy plastic carrying case includes a helpful handle and is lockable. It is a great way to transport your Glo Germ kit and other training tools. Designed and built to last. Inside dimensions: 8" tall, 13.5" wide and 3" deep

GGBC.....\$9.95

Infection, The Game

Infection is a game about medicine and disease for two to eight players. Players start the game with five disease cards and \$500. The race is then on to be the first one completely healthy, and disease free.

INF.....\$30.95

Handwashing Static Cling

Reinforce the importance of thorough hand washing with fun and strategically placed static clings featuring the Clostridium difficile bacteria.

These clings are great for patient and employee restrooms—especially in isolation. Each 2½” x 3½” cling attaches easily to mirrors and windows and can be removed just as easily for cleaning.

HSC.....\$1.25

HSC10.....\$13.95

HSC25.....\$23.25

Dental Static Cling

Stimulate children to be self-directed in brushing and flossing their teeth with this static cling. It attaches easily to the bathroom mirror or ceramic tile to serve a reminder to the whole family. Strep mutans is the nanobug that causes tooth decay. It has an ability to stick to the tooth surface so the educational message on this static cling is: “we don’t let go until you brush and floss”.

Sore No More!

Natural Pain Relieving Gel

What is it?

Sore No More is a blend of plant extracts with the refreshing scent of orange peel and witch hazel, and the deep-heating strength of menthol.

How does it work?

Sore No More works by having a topical anesthetic effect that depresses cutaneous sensory receptors. When these natural ingredients are combined together in precise amounts, they have a synergistic effect that detoxifies tight sore joints, relieves arthritic pain, muscle soreness, inflammation and provides immediate relief of back pain.

- *No animal by-products or testing
- *Non-staining
- *Oil, Wax & Alcohol Free
- *100 % All Natural
